

## Heavy Metal Testing (MONTH) 2024

*It's nearly impossible to have a product that is completely free from heavy metals. They are naturally occurring in the soil and water due to decades of pollution and contamination. Below you can find test results for heavy metal levels in all our products, along with the assurance that all our snacks meet the safe levels prescribed under any existing government legislation.*

Product	Report Date	Lead	Cadmium	Mercury	Arsenic	Inorganic Arsenic
